PROFESSIONAL EXPERIENCE

VitalOrgans-Emergency Response: Link Video Github

Objective :   Enhanced Emergency response by providing hospitals with instant access to a patient's medical history.

Technologies: Tailwind CSS, AWS, React.js, Node.js, Express.js, PostgreSQL, Git, JIRA, GitHub

Achievements:

- Using Tailwind CSS achieved full responsiveness and cross-browser compatibility.
- Utilized AWS S3 for secure upload, storage and management of PDF medical reports
- Using Node.js for server side logic and PostgreSQL database for data storage and React.js for client side logic.
- Implemented a secure role based authentication system for licensed hospitals using a license key.
- Utilized Git, Jira and GitHub for effective project management.

HomeFit: Link Github

- Is an e-commerce platform dedicated to providing top quality home fitness equipment.
- Used Vanilla JavaScript ,CSS media queries for responsiveness.

PharmaKeeper-MedicineKit: Link Github

- Personal Medicine Manager that tracks every medicine, its brand name, expiry date, quantity and description with ease.
- Implemented CRUD operations for medicine entries using Vanilla JavaScript.
- Developed an image upload feature to assist users in visually identifying their medicines, enhancing usability.
- Using CSS media queries for responsiveness.
- Integrated the Web Speech API to support voice commands for data input.
- Designed a color-coded notification system to highlight medicine expiry statuses.

CERTIFICATES

- **Modern JavaScript From The Beginning 2.0 (2024) , Udemy**
- **The Ultimate React Course 2024 , Udemy**
- **Node with React : Fullstack Web Development , Udemy**

EDUCATION

Master's Degree, Political Science And Government   University Of Rajasthan, Jaipur, India
